

Partners \_\_\_\_\_

# “The Last \_\_\_\_\_ Video” Project

In this short project, you and a partner will create a video that is based on a simple dilemma or problem.

This video will have a Beginning, Middle, and End that will showcase this dilemma.

## The Beginning:

- In the beginning, the video will set up the dilemma or problem that is happening between two people.
- This problem will involve one object that both people want.
  - For example, ‘there is only one cookie left and both of you want it’

## The Middle:

- In the middle, the video will show how the two people resolve the problem. How will you solve the issue?
  - Ex. Rock paper scissors, flip a coin, or pick a number to see who gets the cookie

## The End:

- The end of the video will show the result of the solution.
  - Ex. One person eating the cookie, while the other person still hungry

## Your Task:

1. Brainstorm with your partner a simple problem and solution: What will be your item that you only have one of? How will you decide who gets the item?
2. Create a storyboard that tells the story of your video – include a Beginning, Middle, and End
3. Your storyboard should include the different types of shots: At least one of the following: establishing shot, wide shot, medium shot, close up, zoom in)
4. Hand in your idea to your teacher
